

# DELPHIN PRO

## AdBlue® Fuel transfer kit

### Safe and uncomplicated refueling of cars and transporters with AdBlue®

The mobile AdBlue/DEF fueling set Delphin PRO is developed for a fast, safe and uncomplicated refueling of cars and light commercial vehicles. Special attention was paid to a simple and self-explanatory operation. The filling & operation is starting with an on/off switch and a start button. The fully automatic operation of the unit eliminates the need for a costly product training

**The universal ISO connector:**

The screw on filling fitting is perfectly designed for tight connection conditions. An overcharge of the AdBlue/DEF tank/vehicle will be denied by the sensor-controlled filling adapter. Dripping after removing the Delphin PRO is effectively prevented by a filling head with a patented automatic shutdown.

Delphin PRO with 200 liter barrel\*

Technical Data: Art. Nr.: 81610P			
Grid connection	230 V/50 Hz and Schuko plug	Weight	48 kg
Max. Output	Level 1: 3l/min Level 2: 10l/min	Hose Length	2 m
Display	electronic, multi languages	Drum Adapter	AF2 with 56x4 thread – 1" BSP
Counter	max. 6 Digits, not calibrateable	Size	height: 120 cm length: 83 cm width: 80 cm (200l) 64 cm (60l)
Accuracy	± 1%	Drum space	60 Liter und 200 liter-barrel

### Trolley

The sturdy tubular trolley frame can handle two different barrel sizes 60L or 200L drums.

# DELPHIN PRO

for a fast, safe and uncomplicated refueling of cars and light commercial vehicles

This new system meets all professional requirements of garages and car workshops. It is easy to handle and allows a safe filling with AdBlue®. Delphin PRO consists of a stable tubular frame where the barrels can be installed easily. The car will be automatically filled by pressing the start button.

## Fast and automatic refilling

Delphin PRO is extremely easy to use because it is fully automatic. All you have to do is turn Delphin PRO on and start the fluid dispensing. Once the tank is full, Delphin PRO automatically stops dispensing at precisely the right moment.

**Delphin PRO with 60 liter barrel\***

**\*also available in a battery driven version (one battery load is sufficient for 50 fillings)**

## "Closed System"

The AdBlue/DEF filling set Delphin PRO is a completely sealed system. The escaping air during the filling of the vehicle tank will be vacuumed back via an airtight seal into the discharge tube. From here forwarded back into the AdBlue/DEF barrel. Therefore a contamination of the ambient air/environment or the vehicle interior with AdBlue/DEF gases is avoided.
