

Suction-Set ELEPHANT

The off the line device is assembled quickly and immediately ready to use with any AC or DC drill.

- ▶ quick, compact, reliable
- ▶ dry self priming impeller pump
- ▶ left-right rotation
- ▶ with flat suction mat and strainer
- ▶ inexpensive

Suitable for various applications:

The kit comes with flat suction mat and strainer. This allows for quick extraction of fluids in a number of applications. Flat vacuum technology removes fluids almost completely, in contrary to submersible pumps or wet vacs. Works also on large surfaces.

For Electricians:

Drain down to near dry after leaks of all kinds (washing machine, dish washer, dryers etc.)

For Heating Contractors:

Remove puddles completely after maintenance works on boilers or hot water tanks within a few minutes.

For Plumbers:

Drain pump sumps or lifting units efficiently.

equipment

	Pump	Hose	Flat suction mat and strainer	Box	Art.N°
ELEPHANT	Drill Pump UNISTAR 2001-B	2 x 3 m reinforced, 3/4" with fittings	✓	Transport box with lid 528 x 310 x 320 mm	1101511

Flow rate (max. 60 l/min) and pressure (max. 4 bar) depend on power of drill.
